

GSX Releases New Monitor & Analyzer for Diverse Enterprise Collaboration Messaging and Mobile Environments

Latest v10 release extends consolidated reach to Lotus Notes Traveler, IBM Quickr, IBM Sametime 8.5, Microsoft Exchange 2010, and Microsoft SharePoint

Buffalo, NY – June 15, 2011 — [GSX Solutions](http://www.gsx.com) [www.gsx.com], the global leader in proactive, consolidated monitoring, reporting of enterprise messaging and collaboration environments, including [Lotus Notes](#), [Microsoft Exchange](#), and Blackberry Enterprise Server ([BES](#)), today announced the general availability of the [GSX Monitor & Analyzer v10](#). The new release comes with expanded features, plus support for [Lotus Traveler](#), [IBM Quickr](#), [IBM Sametime 8.5](#), [Microsoft Exchange 2010](#), and Microsoft [SharePoint](#) servers. The v10 release provides a new modular install for selected server types and components, a revamped user interface, simplified server settings, and new reports to track mail forwarding.

“The Flex-based GSX Analyzer has been improved again, permitting more customization on reports. For those that don’t know, Analyzer will take all the statistics from Monitor, output them on a very pretty, flexible web-based UI, or email you statistics in a customizable pdf on a set schedule. If you are an administrator, you want this,” commented Paul Mooney, Senior Technical Architect at Bluewave Technology and Lotus Specialist

“Our tests showed GSX Monitor v10 to be the perfect solution for proactive monitoring in the cloud,” said Olivier Constant of Darest. “If all of your messaging and collaboration services are in the cloud, there is no other way to know of a problem until it occurs – with GSX v10 you will know it beforehand. When there are issues with security and visibility, that’s a perfect situation for v10. Even if your servers are outside the firewall, you’ll know the exact status of every server in the cloud.”

“GSX v10 enabled our team to take proactive, real-time control of our 24 Blackberry, Domino, and Traveler servers with 3,225 users,” said Sander Zwart, Managing Consultant at ilionx ICS. “It is very easy to set up, and gives us a complete overview of all our customers in a single dashboard. We just have to configure it once, and then service level reports are automatically delivered to customer mailboxes each month.”

"GSX Monitor & Analyzer is already the most widely used consolidated management tool for mixed collaboration infrastructures. It could oversee environments such as Microsoft Exchange 2007, Lotus Domino and Blackberry Enterprise Server,” said Antoine Leboyer, CEO of GSX. “This new version extends our capabilities to modern collaboration environments as we add new platforms which are the basis for modern collaboration platforms: Microsoft Exchange 2010 and Microsoft Sharepoint as well as Lotus Notes Traveller, IBM Quickr and IBM Sametime 8.5. All its features were driven by close involvement with our customers and partners base worldwide.”

New GSX v10 Monitoring support includes:

- IBM Traveler service availability, alerts, and device synchronization
- IBM Quickr service availability, tracking, authentication and place monitoring
- IBM Sametime 8.5 services, meetings, and DB2 and Websphere components
- Microsoft SharePoint availability, usage, services, sites, users, and synchronization
- Microsoft Exchange 2010 DAG & DB store availability and performance, and CAS availability
- BES 5 High Availability failover & secondary server alerts, and manual failback reminders
- Domino probes to track index size, databases with indexes, and user-defined thresholds

GSX Analyzer enhancements include Traveler and Quickr reports, multi-server comparatives, structured environmental health reports, improved user setup, and enhanced formatting controls.

GSX Monitor & Analyzer v10 available for immediate download

The new GSX Monitor & Analyzer v10 is now available. A free trial version is open for download at support.gsx.com. For more information on GSX solutions and partner opportunities, please visit gsx.com. For download please to go:
